

Test Plan for app.vwo.com

Created by: Poonam Sharma

1. Objective

This document outlines the test plan for the app.vwo.com which supports A/B Testing for websites. The objective is to ensure that all features and functionalities work as expected and help users optimize their website conversions.

Success Criteria:

- All critical functionalities verified and passed
- Minimal critical defects reported
- Application performance is within SLA thresholds
- High stakeholder and user satisfaction

2. Scope

Features to be tested:

- Login Page
- Dashboard Page
- Create Account Page
- A/B Testing Campaigns
- Reporting and Analytics
- User Segmentation and Targeting

Types of Testing:

- Manual Testing
- Automated Testing (Selenium, API)
- Performance Testing (JMeter)

- Accessibility Testing (WCAG 2.1)
- Security Testing (OWASP Top 10)

Environments:

- Browsers: Chrome, Firefox, Safari, Edge (Latest + N-1)
- Devices: Desktop, Laptop, Tablet, Smartphone
- OS: Windows 10, macOS, iOS, Android

Evaluation Criteria:

- Defect Count & Severity
- Test Coverage & Execution Rate
- Performance Benchmarks & Uptime
- Stakeholder Feedback

Team Roles:

- Test Lead
- Test Engineers
- Automation Engineers
- Developers
- Product Owner

3. Inclusions

- Major workflows: User registration, login, campaign setup, reporting
- Integration testing with analytics and tracking platforms

4. Exclusions

- Backend database tuning

- Detailed third-party service testing

5. Test Environments

- Browsers: Chrome (latest & N-1), Firefox, Edge, Safari
- Devices: Desktop, Tablet, Mobile
- Network: Wi-Fi, 4G
- Access Roles: Admin, QA, End-User

6. Defect Reporting

- Tool: JIRA
- Severity: Sev 1 (Blocker) to Sev 4 (Minor)
- SLA: Sev 1 (Fix in 8 hours)
- Attachments: Screenshots, logs, videos
- Reporting Frequency: Daily defect reports

7. Test Strategy

- Techniques: Equivalence Partitioning, BVA, Use Case Testing
- Testing Types: Smoke, Functional, Regression, Exploratory, Automation
- Automation Tools: Selenium (UI), REST Assured (API)
- Performance: JMeter load simulation (1k users)
- Accessibility: Axe, Lighthouse (WCAG 2.1 Compliance)
- Security: Token validation, session management, OWASP Top 10

8. Schedule

Activity	Start	End
-----	-----	-----
Planning	May 3	May 5

Test Design | May 6 | May 12

Test Execution | May 13 | May 25

Test Closure | May 26 | May 28

9. Deliverables

- Test Plan Document
- Test Scenarios and Test Cases
- Defect Reports
- Traceability Matrix
- Test Summary Report

10. Entry/Exit Criteria

Requirement Analysis:

- Entry: Requirements finalized
- Exit: Requirements reviewed & understood

Execution:

- Entry: Signed-off test cases, stable build
- Exit: All high priority test cases executed

Closure:

- Entry: All testing complete and reported
- Exit: Final sign-off received from stakeholders

11. Tools

- Test Management: TestRail
- Bug Tracking: JIRA

- Automation: Selenium, REST Assured
- Performance: JMeter
- Accessibility: Axe, Lighthouse
- Communication: Slack, Confluence

12. Risks & Mitigations

Risk	Impact	Mitigation
-----	-----	-----
Build delays	High	Regular build checks
Environment instability	Medium	Parallel test setups
Limited test data	Medium	Synthetic test data

13. Approvals

Name	Role	Date	Signature
-----	-----	-----	-----
Poonam Sharma	Test Lead	May 3, 2025	_____
Product Owner	Stakeholder	May 3, 2025	_____
